

AT-44 All-Round Lubricating Spray is a special spray used for lubrication and protection. It can be used on all kinds of surfaces and creates a dry film that does not attract dirt or dust. This is important as these small grains can have a disastrous effect on load bearing parts and significantly increase friction.

Our AT-44 All-Round Lubricating Spray not only prevents this but is itself a highly effective lubricant. Thanks to the PTFE used in its formula, AT-44 has a very low coefficient of friction. It reduces wear and helps parts operate with increased efficiency.

Our AT-44 All-Round Lubricating Spray is manufactured in Germany and is used in homes, workshops and heavy industry all around the world. This is largely due to its versatility as it is much more than just a lubricant.
