

Chain and Rope Lube Spray is a high performance industrial lubricant. This spray has been specially designed to provide very strong adhesion so that it continues to perform in application with large amounts of friction and wear. It is a synthetic lubricant used for both internal and external lubrication and is transparent.

Chain and Rope Lube Spray is particularly well suited to highly stressed chains and wiring. It remains in place in these applications and, thanks to its excellent creeping properties, effectively penetrates the parts to provide excellent lubrication. It is also widely used on gear wheels, worm gears, fast running machine parts, joints, couplings, rollers, ball bearings and spring assemblies.

Our Chain and Rope Lube Spray is manufactured by Weicon in German. In addition to its excellent lubrication and creep properties, it also suppressed noises and repels water. This lubricating also works to prevent elongation, wear and friction to increase the life and efficiency of your equipment.

Technical Details

Property	Value
Colour	Colourless
Scent	Mineral Oil
Temperature Resistance	-40°C to +200°C
Minimum Shelf Life	24 Months
ISSA Reference	53.402.15
IMPA Reference	45 08 29

Instructions for Use

Clean and dry the surfaces before application. Shake can and spray on from a distance of about 15cm. This lubricant may, thereafter, be applied while parts are in operation subject to the relevant safety regulations.

Storage

Chain and Rope Lube Spray is supplied in a pressurised container. It should be stored in a cool, dark place and protected from direct sunlight. Do not expose to temperatures exceeding 50°C.

Available Sizes

Weicon Chain and Rope Lube Spray is available from Swift Supplies Australia in 400ml cans.

Important
