

Hand Protective Foam is a specialised product that is applied directly to the hands before work commences. It quickly dries to form an invisible pair of gloves that help to protect hands from dirt, oils, greases and other contaminants and irritants.

Manufactured by Weicon in Germany, this high-quality foaming spray has been dermatologically tested and contains liposomes for additional skin care. The barrier created by the foam is grease-free and is also water proof.

Hand Protective Foam is widely used in numerous industries around the world and is a handy addition to any workshop.

### Using Hand Protective Foam

- Before starting work, spray the foam onto your hands and rub it in. Ensure you do not miss your finger tips and fingernail beds.
- Leave it on for around 2 minutes to allow it to form a waterproof, invisible film that will protect your skin and pores from many irritants, lubricants and greases.
- Once work is complete, the film and any greases or dirt that have stuck to it can be washed off easily with warm water. Only in cases of heavy soiling will additional cleaning agents be required.
- Please note, these are general guidelines only. For more specific information, we do recommend consulting the Safety Data Sheet for our Hand Protective Foam.

### Technical Details

Property	Value
Colour	Transparent (White Before Drying)
Scent	None (Odourless)
Shelf Life (Minimum)	24 Months
ISSA Reference	53.402.16
IMPA Reference	45 08 36

### Storage

Hand Protective Foam is supplied in a pressurised container. It should be stored in a cool, dark place and protected from direct sunlight. Do not expose to temperatures exceeding 50°C.

### Available Sizes

Weicon Hand Protective Foam is available from Swift Supplies Online in 200ml cans.
