

Label Remover Spray is a specially designed release spray used to quickly and easily remove old adhesive labels and residues. This technical spray has been engineered to break the adhesive bonds of acrylate and pressure-sensitive adhesives. It works very fast and is very easy to use.

This specialised spray can be used on most surfaces types including metal, wood, foil, plastic and glass. It is ideal for removing adhesive labels, old price tags, address labels, product information stickers, identification labels and label residues. It also removes adhesive residues from foil labels which makes it a great option for getting rid of that sticky stuff left over from your old rego sticker.

Unlike conventional cleaning agents, label remover penetrates the adhesive to make removal easy. It also doesn't represent the risk to the underlying surface that mechanical removal can.

Our Label Remover Spray is manufactured by Weicon in Germany and is used in many countries around the world. Each can is supplied with a specially designed plastic spatula to make removal simple and easy.

Label Remover Spray has a citrus smell and is colourless. This technical spray also evaporates away without leaving behind any residues. This means new labels can be affixed to the surface shortly after without any problems.
