3M 2214 Masking Tape
Quick Reference Guide

Overview

3M 2214 Masking Tape is ideal for those who need a general-purpose paper masking tape without compromising on quality.
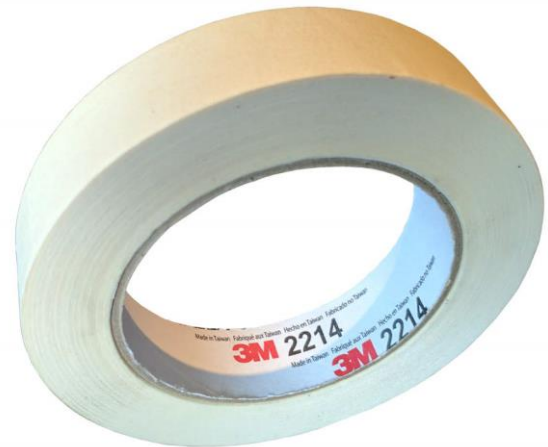

3M 2214 is tan in colour and is manufactured from a crepe paper backing with a rubber based adhesive. This results in a tape that is very flexible, conformable, and able to be applied accurately with tight turns or to complex shapes.

3M 2214 Masking Tape has low stretch properties and can be torn by hand.

It resists bleed through and bonds quickly to most surfaces. It also removes cleanly and does not leave behind unwanted adhesive residue.

Typical applications include:
- General purpose masking.
- Sealing and bonding.
- Bundling and identification of cables.

Key Specifications
