

3M Scotch 233+ Performance Masking Tape

Quick Reference Guide

Overview

3M Scotch 233+ Masking Tape is a high-quality grade of green masking tape used when you simply can't compromise on quality.

Sometimes known as fine line tape (a name typically associated with the 3mm wide variety) or green painter's tape, Scotch 233+ has excellent transfer resistance, bleed through resistance and the ability to remove cleanly even after prolonged placement.

Scotch 233+ Masking Tape is instantly recognisable because of its distinctive green colour. This tape is highly conformable and can be accurately applied to tight turns and bends and is also used for airbrushing.

Scotch 233+ removes cleanly, even after exposure to temperatures up to 121°C (for 30 minutes). It can be torn by hand yet has little stretch and excellent adhesion to a wide range of surface types.

Typical applications include:

- Painting fine lines with high accuracy.
- General painting work.
- Applications that require the masking tape to be placed for a prolonged period.
- Masking complex shapes.

Key Specifications

Colour	Green
Adhesive	Rubber Pressure Sensitive
Backing	Crepe Paper
Temperature Rating	121°C for 30 Minutes max.
Elongation	10%
Total Thickness	0.17mm
Tensile Strength	438 N/1000mm
Adhesion to Steel	41 N/100mm
