

Cable Stripper No. S 4 - 28 Multi Quick Reference Guide

Overview

Our Cable Stripper No. S 4 – 28 Multi is a versatile stripping tool that can be used with a large range of cable sizes. This tool combines two distinct functions into one.

The main blade is infinitely adjustable using the rotating wheel in the handle. This allows you to set it so that the tool will precisely strip back the insulation while leaving the conductor untouched. This blade is self-rotating which lets you automatically switch from circular (around the cable) to longitudinal (along the cable) stripping.

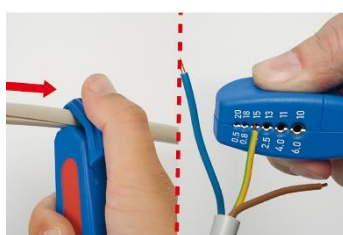

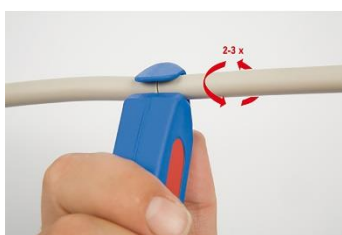

The large range of adjustments that can be made to the main blade allows this tool to be used for stripping cables with a cross section between 4mm and 28mm diameter.

Another feature built into this tool is the wire stripper located in the handle. This is ideal for quickly stripping smaller cables and wires. It consists of a series of holes and can accommodate cables and wires between 0.5mm² and 6mm².

Key Specifications

Cable Types	Fine Wired and Solid Conductors with PVC Insulation
Size Range(s)	Cables with an external diameter between 4mm & 28mm
Inner Blade	Replaceable
Additional Features / Benefits	Strips Conductors between 0.5mm ² and 6mm ² Cross Section
