

# Electro Contact Cleaner Spray

## Quick Reference Guide

### Overview

Electro Contact Cleaner Spray is a specialised, high-quality cleaning spray designed specifically for use on electrical, electronic and mechanical components. It effectively cleans and degreases all kinds of soiled and/or corroded contacts and is widely used in the electrical repair, mining, marine, engineering, automotive & DIY sectors.

Made in Germany, this spray is based on a special formulation of high purity solvents that allows it to clean without damaging the contacts. It is a fast acting and effective cleaning spray that removes oxide layers, sulphide layers, combustion residues or resinous or sooty soiling.

By cleaning the contacts it reduces voltage loss and increases electrical conductivity. This allows devices to operate at higher levels of efficiency and minimises the risk of damage caused by tracking current which can be enabled through contamination.

### Electro Contact Cleaner Size and Info.

To quickly find this spray on our website, just search for the SWM part number listed. Alternatively, browse find it directly at [swiftsupplies.com.au/weicon-electro-contact-cleaner-spray-400ml](https://www.swiftsupplies.com.au/weicon-electro-contact-cleaner-spray-400ml)
