

Overview

Our Industrial Cleaner Spray is part of our special range of NSF approved sprays for the Food, Beverage and Pharmaceutical sectors. This spray is a universal style cleaner that effectively removes most kinds of dirt and impurities including oil, grease, and soot.

Industrial Cleaner Spray is made with a highly compressed propellant. Consequently, it has a very high (95%) active ingredient content. This means that one can of this cleaning spray can cover a significant area.

Manufactured by Weicon in Germany, this special cleaner is suitable for use with all kinds of metal, glass and ceramic. Industrial Cleaner is also used with rubber materials and parts as well as powder coated metal surfaces. It is also compatible with most types of plastic and tile (though we suggest a test on an out of the way area first just to be safe).

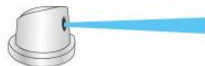

Key Specifications

Colour	Transparent / Clear
Smell	Solvent
