

Overview

Neoprene Rubber Sheet is a versatile and economical general-purpose rubber. Sometimes known as Chloroprene (CR), Neoprene was the first inorganic rubber compound and was developed specifically to compensate for Natural Rubber's incompatibility with oils and fuels.

Neoprene Rubber is ideal for sealing these kinds of fluids and offers good strength, general chemical compatibility and UV resistance.

Used for a variety of applications including...

- Seals & gaskets for water pipes and tanks.
- Oil seals and gaskets.
- Rubber floor matting.
- Sealing refrigeration fluids.
- Sealing strips, bumpers and linings.
- Automotive & marine gaskets.
- Drain and roof join sealing.
