Nylon Cable Glands
Quick Reference Guide

Overview

Our Nylon Cable Glands are widely used in the electrical, communications and data industries. These high-quality glands have a IP68 (ingress protection) rating and are available in a selection of sizes.

Each one of our Nylon Cable Glands is manufactured from high quality, 6/6 Nylon and is supplied complete with a silicone rubber seal. These glands have very good UV resistance and have a vibration resistant ratchet fastener.

These cable glands are certified to UL 94 V2 and have a standard metric mounting thread with a 1.5mm pitch. They have an operating range of -40°C to +100°C and are black in colour. These cable glands can be used indoors or outdoors.
.
Typical Applications include…

- Cost effective way of terminating cables to cabinets or enclosures.
- Sealing out dust or water.
- Protecting cable as it passes through walls, switchboards or cabinets.

Key Specifications

| Colour	Black
