

# Professional Grade Caulking Cartridge Gun Quick Reference Guide

## Overview

As any tradesperson will tell you, having the right tool can make a job a lot easier. For those needing to apply silicone, elastic adhesives or polyurethanes from a cartridge, our Professional Grade Caulking Cartridge Gun is designed to help.

This high-quality grade has been designed by Weicon in Germany but it works just as well with other brands of adhesives and can accommodate any cartridge up to 310ml.

This premium grade caulking gun is manufactured from hardened, lightweight plastic polymers and hardened steel. It is designed for long term performance. The handle has a special, ergonomic design that helps to reduce stress and fatigue on your hands while the chamber has been designed to allow for easy cartridge switching and to help reduce drips and wastage.

The barrel also rotates which can help with accessing corners and make applying a consistent bead simple.

## Professional Caulking Cartridge Gun Info.
