

# Sanitary Silicone, Acetic Cure Quick Reference Guide

## Overview

Our Sanitary Silicone – Acetic Cure is a one-part silicone adhesive and sealant that combines high adhesive strength with long lasting performance.

This grade is 100% acetic curing and resists mildew build-up even over long term exposure to hot and humid environments. This makes it ideal for use in kitchens, bathrooms, vanities, shower screens and other areas expected to see a significant amount of wetness or moisture.

Sanitary Silicone is non-slump, has excellent UV resistance and weatherability and bonds well to a huge range of surfaces.

These include glass, ceramics, masonry, stone and aluminium. It is available in both translucent and white.

Typical applications include...

- Sealing around kitchen benches, sinks, splashbacks and tiles
- Bonding in high humidity areas such as bathrooms, laundries or kitchens
- Sealing bathroom fixtures
- Sealing showers, sinks and baths
- General glazing and weatherproofing applications

## Key Specifications
