

Stainless Steel Spray - Bright Grade Quick Reference Guide

Overview

Our Weicon Stainless Steel Spray (Bright) is similar in form and function to our standard Stainless Steel Spray with one main, important difference: the colour. This spray creates a brighter finish that is like treated stainless steel.

Bright Stainless Steel Spray is suitable for use on surfaces indoors or outdoors. This spray is extremely weather resistant and very long lasting.

One of the main applications for our stainless steel sprays is covering up rust (see our Rust Converter for a suggested pre-treatment) or preventing rust from forming in the first place.

In these applications, this spray excels as it has excellent corrosion resistance. Our Stainless Steel Spray Bright Grade has been tested in the DIN EN ISO 2409 Salt Spray Test where it achieved a solid result of >140 Hours. This test sees coated objects subjected to concentrated salt spray to simulate natural weathering.

A result of over 140 hours of protection ensures this spray will provide years and years of rust proofing and corrosion prevention.

Bright Stainless Steel Spray Size and Info.

To quickly find this spray on our website, just search for the SWM part number listed. Alternatively, browse find it directly at [swiftsupplies.com.au/weicon-stainless-steel-spray-bright-400ml](https://www.swiftsupplies.com.au/weicon-stainless-steel-spray-bright-400ml)
