

## Overview

Viton Rubber Sheet is a premium grade elastomer used in the most demanding of applications. This rubber will withstand continuous exposure to temperatures between -17°C and +200°C and has very good physical and mechanical properties.

Sometimes known as FKM (often when it is not made with genuine Viton), Viton Rubber was originally developed for the aerospace industry to meet their demands for a high-performance elastomer. It is now used by many other industries for its excellent chemical resistance and all-round performance as a sealing material.

Used for a variety of applications including...

- Flange Gaskets.
- Lining of tanks storing chemicals, oils, diesel, petrol, and other aggressive media.
- Chemical transfer and joining sleeves.
- Expansion joints & Isolation Barriers.
- Sealing and insulating strips.
- Chemical proof flashing.
