

Weicon Starter Spray is a high powered, German-engineered spray designed to help get engines started. Manufactured from highly active ingredients, this spray can be used on both petrol and diesel combustion engines either with or without a catalytic converter.

Sprayed directly into the air-intake or air-filter, Starter Spray assists with engine start-up and works very quickly. It is manufactured in Germany from a special formula that is designed to not only work, but also to be kind to engine parts and batteries.

Starter Spray is ideal for starting engines or motor in cold or damp conditions or when they haven't been used in a while. This is a colourless spray that has a slight solvent smell when it's used.

Applications

- Lawn Mowers
- Chain Saws and Hedge Trimmers
- Boat Engines
- Cars and Motor Vehicles
- Motorbikes and Scooters
- Construction Machinery
- Farm Machinery
- Starting all kinds of combustion engines (regardless of whether they are diesel or petrol powered).

Technical Details

Property	Value
Colour	Transparent / Colourless
Scent	Solvent
Shelf Life (Minimum)	24 Months

Instructions for Use

Shake can before use. Spray Starter Spray directly into the air inlet or onto the air filter, wait for a moment and start engine slowly. The use of a choke or preheating a diesel engine is not required. Repeat process if necessary.

Storage

Starter Spray is supplied in a pressurised container. It should be stored in a cool, dark place and protected from direct sunlight. Do not expose to temperatures exceeding 50°C.

Available Sizes

Weicon Starter Spray is available from Swift Supplies Australia in 400ml cans.
